

Subject index to volume 5

- Abstracts of the 6th Annual Scientific Meeting of the Fertility Society of Australia, 1987 273, 381
- adoption, non-medical selection criteria for 55
- AIDS, and donor insemination 89
- analgesia, intravenous, in oocyte retrieval 263
- androgen, rising levels in polycystic ovary syndrome 167
- anti-androgen treatment 67
- antibodies
- azoospermia 347
 - monoclonal, for LH test 211
 - sperm, detection of 203
- antigen, cancer 125
- and endometriosis 215
 - in semen 85
- anti-oestrogens, for infertile women 133
- antiprogesterones, for contraception 221
- antisperm antibodies 347
- artificial insemination
- New Zealand donors 177
 - non-medical selection criteria for 55
 - using a donor 89
- aspiration of oocytes, comparison of transabdominal and transvaginal methods 373
- atherosclerosis, induced by oral contraceptives 333
- auto-immunity to sperm in Korean males 347
- basal body temperature, indication of ovulation 91
- blood coagulation, induced by oral contraceptives 333
- book reviews 219, 379
- breast milk, ovulation indicator in 237
- bromocriptine, influence of hyperprolactinaemia 359
- cancer antigen 125
- and endometriosis 215
 - in semen 85
- cardiovascular effects of oral contraceptives 333
- cervical mucus, ovulation indicator 91
- cervical obstruction, and IUD insertion 173
- Clomid, in ovarian follicular fluid 245
- clomiphene citrate
- in ovarian follicular fluid 245
 - isomers, en- and zu- 245
- coagulation-liquefaction, properties of human ejaculate 367
- contraception
- female, new methods of 221
 - gonadotrophin analogues 237
- contraceptive implants, new 221
- contraceptive pill, effects on plasma lipids 333
- cooling devices, the scrotum 269
- criteria
- for adoption selection 55
 - for artificial insemination selection 55
- denistometry patterns, of seminal plasma proteins 45
- donors, semen
- and AIDS 89
 - psychosocial characteristics in NZ 177
- ejaculate, human, properties 367
- embryonic mortality, early 15
- endometriosis
- and cancer antigen 125, 215
 - and infertility 153
 - mild 87
 - minimal 119
- epididymovasostomy, sperm auto-immunity 347
- family planning, natural indicators of ovulation 91
- fertility
- capacity of human spermatozoa 5
 - regulation, new methods in women 221
- FSH, to induce ovulation in polycystic ovary syndrome 167
- gonadotrophin
- analogues for contraception 237
 - and ovulation induction 127
 - responses to oestrogen provocation 119
- granulosa cell progesterone secretion, effect of clomiphene citrate 245
- human chorionic gonadotrophin as luteal phase support 255

434 Subject Index

- human semen, properties of 367
- human spermatozoa
 - densitometry patterns 45
 - morphology 37
 - penetration of zona-free hamster eggs 1
 - prediction of fertilising capacity 5
- hyperprolactinaemia, effect of bromocriptine 359
- hypothermia device, testicular 269
- immunobead test, for sperm antibodies 203
- implant, non-biodegradable contraceptive 221
- infertility
 - and abnormality of hypothalamopituitary function 119
 - and endometriosis 153
 - and luteal phase defects 133
 - due to mild endometriosis 87
 - male 269
 - treated with LHRH analogue 133
 - unexplained 133
- intravenous analgesia, oocyte retrieval 263
- in vitro* fertilisation
 - and clomiphene citrate 245
 - and multiple follicular growth 141
 - and semen maturity 191
 - comparison of transabdominal and transvaginal methods 373
 - intravenous analgesia 263
 - luteal phase support 255
 - of zona-free hamster eggs 1
 - stress for workers in 27
- isomers, en- and zu- clomiphene citrate 245
- IUD
 - insertion and cervical obstruction 173
 - steroid-releasing 221
- job satisfaction, for *in vitro* fertilisation workers 27
- Korean males, sperm auto-immunity 247
- lactation, natural family planning during 91
- laparoscopy and laparotomy to detect follicle rupture 321
- LH quantitation by reflectance meter 211
- LHRH
 - analogue therapy for infertile women 133
 - pulsatile administration 141
- lipids, effects of oral contraceptives 333
- liquefaction-coagulation properties of human ejaculate 367
- luteal phase defects, and female infertility 133
- luteal phase support, after *in vitro* fertilisation 255
- luteinized unruptured follicle syndrome 321
- male infertility, testicular cooling device 269
- menstruation onset, time of day of 77
- micro-adenoma and hyperprolactinaemia 359
- mixed antiglobulin reaction test, for sperm antibodies 203
- monoclonal antibodies, test for LH 211
- morbidity and mortality of oral contraceptives 333
- motility of human ejaculate 367
- non-biodegradable contraceptive implants 221
- nuclear chromatin decondensation, spermatozoal 191
- oestrogen provocation 119
- oocyte retrieval
 - comparison of transabdominal and transvaginal methods 373
 - transvaginal ultrasound-guided 263
 - under intravenous analgesia 263
- oral contraceptive-induced changes in plasma lipid profile 333
- ovarian follicles, stimulation of multiple growth 141
- ovarian follicular fluid, clomiphene citrate in 245
- ovulation
 - indications in breast milk and saliva 237
 - induction in polycystic ovary disease 167
 - induction with gonadotrophin 127
 - methods of confirmation 321
 - natural indicators of 91
- ovum penetration test, to predict fertility 5
- plasma lipids, effects of oral contraceptives 333
- polyacrylamide gel electrophoresis 45
- polycystic ovary syndrome, ovulation induction 167
- pregnancy
 - loss 15
 - rates 127
 - subclinical 15
- progesterone
 - secretion *in vitro* 245
 - supplementation 133
- progestogen, low-dose contraceptive methods 221
- proteolysis, effect on seminal plasma proteins 45
- psychosocial characteristics, of semen donors in NZ 177
- radio-immunoassay
 - of seminal transfer in 67
 - of serum cancer antigen 125
- reflectance meter, to quantify urinary LH 211

- regulation of fertility 221
- rhythm method, natural family planning 91
- saliva, ovulation indicator in 237
- selection criteria
 - for adoption 55
 - for artificial insemination 55
- semen analysis
 - abnormalities in 127
 - and testicular temperature 269
 - cancer antigen 125, 215
 - consistency of observation 37
 - test for sperm immaturity 191
- semen donors
 - and AIDS 89
 - psychosocial characteristics 177
- seminal plasma
 - protein densitometry patterns 45
 - transferrin following anti-androgen treatment 67
- Sertoli cell, activity following anti-androgen treatment 67
- serum prolactin concentration 359
- sperm antibodies, immunobead test for 203
- sperm auto-immunity, associated with
 - vasectomy, vasovasostomy and epididymovasostomy 347
- sperm count of human ejaculate 367
- sperm, test for immaturity in human 191
- sperm morphology, consistency of observations 37
- steriodogenesis 245
- steriod-releasing IUD 221
- stress, in *in vitro* fertilisation workers 27
- testicular temperature and semen analysis 269
- thrombo-embolism, induced by oral contraceptives 333
- transferrin, radio-immunoassay of seminal 67
- transvaginal ultrasound-guided oocyte retrieval
 - comparison with transabdominal methods 373
 - use of intravenous analgesia 263
- ultrasound
 - comparison of transabdominal and transvaginal aspiration methods 373
 - for detection of follicle rupture 321
 - guidance in oocyte retrieval 263
- urinary hCG, demonstrating embryonic mortality 15
- uterine perforation during IUD insertion 173
- vaginal rings, contraceptive 221
- vasectomy, vasovasostomy and sperm auto-immunity 347
- verapamil, and penetration of zona-free hamster eggs 1
- volume of human ejaculate 367
- zona-free hamster eggs
 - ovum penetration test 5
 - penetration by human spermatozoa 1
